without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 178 West Jackson boulevard, Chicago, Ill., and only ose two-cent stamp for reply.

Seven rooms are economically tuckroof of the house illustrated in the design here shown. This house is on the ground, without measuring the than most people realize. A home porches.

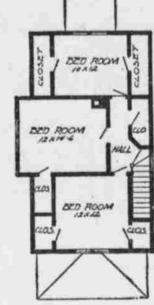

This is an economical way to build medium-sized house, because you get the roof space for the upper rooms-space that is very often just thrown away on an attic. The upper "ooms fit into the gables, and the tothes closets at in between the bedrooms and the lower part of the roof; so there is no waste space at all, and you get square ceilings, too-or nearly 80.

It depends a good deal on climate whether you want a house built like this, or whether you want to elevate the roof clear above the upper rooms. In some hot valleys where the sun seems to beat down a little hotter each day during the summer, a higher roof might be an advantage; but on the porthern hills where few really hot days are known and where the nights are usually cool, this style of house is just about as comfortable as any in the summer time, and it is a great deal warmer and more cozy in winter. Our northern climate seems to have a good deal more winter than

cloudy days and cool weather. house plans are for. If a person has of course, you must have a place for a plain, straight-forward plan of a them and have them in their right house, with the size plainly given and places. You cannot buy a miscelthe shape and the size of the rooms laneous assortment of such things

Mr. William A. Radford will answer questions and give advice FREE OF containing to the subject of building, for the readers of this paper. On account of his wide experience the most satisfactory way of going as Editor, Author and Manufacturer, he upstairs. Other arrangements have been tried repeatedly; but builders have never found a satisfactory substitute for a front hall and a stair of this kind. It lands far enough back upstairs to leave room for a good bedroom in the front part of the house. ed away within the four walls and and it does not spoil any room either upstairs or down.

A house of this style lends itself a the story and a half plan, is easily as part of a plan of outside 22 feet 6 inches wide and 36 feet long decoration. There is more in this

Wealth in Bulgaria.

Wealth is more evenly distributed in Bulgaria than in any other European state. Poverty, according to Edward Dicey, "does not exist among the turbed, but what of that?" Bulgarians." In the towns there are individual cases of destitution, owing to drink and misconduct, but these cases are few and insignificant. There is no need to make any public provision for the relief of the poor; there is no question of the conflicting interest of workmen and employers; strikes and trade unions are alike unknown. Bulgaria, as at present constituted, approaches as closely as is all human institutions to the ideal ers, in which there are to be no poor no social distinctions.

BY JAMES HARDING,

"Well, wouldn't that make you tired!" called Mrs. Brill as she came out on her back porch and slammed the door sharply behind her.

Her neighbor, Mrs. Graves, looked up in surprise, for Mrs. Brill was of a most unruffled demeanor ordinarily. Sitting back on her heels in the grass, she abandoned her pursuit of dandelions long enough to inquire sympathetically, "What would?"

Mrs. Brill's prettily frilled dust cap fairly stood on end with indignation. T've been trying to get Raymond's school by telephone for at least half an hour. You know my sister and her little boy are coming up for the day, and, of course, Raymond wants to stay at home. Well, he's in the entertainment next week and I wanted to tell his teacher he'll be absent today and I wanted to find out about his costume. But do you suppose I could get that school? No. indeed! And I tell you, Mrs. Graves, the phone service we have here now is something awful. There is a phone at the school, for I saw it one day. There is no number in the book and all could get out of those girls was 'We have no record.' I tell you our improvement association ought to get after the phone service instead of putting up any more fancy street lamps.

"Now, Mrs. Brill," expostulated the woman two doors away, who had suspended operations on her clothesline to listen and who stood drooping gracefully over the fence and rattling the clothespins in her apron pocket. "It isn't the fault of the telephone at all; it's the schools, or the school board, or something. Listen to what happened to me the other day.

"I wanted to go down town early and get at the sales before the bargains were all picked over," related the woman two doors away. "I hurried so that I forgot to take the pigs' feet off the stove that were cooking for my husband's supper. He likes them once in a while and they have to be fixed just so in'order to suit him. These were awfully nice ones and I wanted to cook them as long as possible. On the car I remembered that I hadn't removed them, but the gas was turned low, so they couldn't burn very Well, I hurried to the nearest soon. phone to call up Bobbie at his school and tell him to run over at recess time

"But do you suppose I got any satisfaction? Well, I didn't. Oh, I was mad! Here I had planned on those what they had, just bought some things in a hurry and then rushed home. I was hardly in time either, for those pigs' feet were scorched.

"Then my husband got mad. You in the past few years along the line know, John is awfully particular about above considered, but I am fully aware what he eats. And I had to send the there is plenty of room for considerfurniture back because it wasn't at all able more along the line of combinder to do so. what I wanted."

She paused a moment for breath and to enjoy the sympathetic comments of her neighbor. Then, with a coquettish toss of her head, she continued: "Well, I just told John how it all was. You see, my husband knows the superintendent of this district real well. They go down together on the 7:45 train real often. So he'll just fix it up at headquarters. The idea of not being able to phone to one's wn child in a city of this size!" Mrs. Brill nodded emphatically at

Mr. Primrose McConnell supports this view when he writes that "in his hovbood he had herded sheep and cows together in hot summer weather. and been struck by the cows constantly repairing to the water, while the sheep seen to drink at all, although they had access to a running stream close at hand." He adds that a northern shepherd would ridicule the idea of a most profitable sheep for the average sheep ever drinking unless it was in bad health. This opinion I can endorse with slight modification, as my idea in the north of England was that sheep were practically independent of

That this is also true to a certain extent in the south is shown by the practice of many good shepherds, who do not allow their ewes water during the period of gestation. There are circumstances in which this rule is not adhered to, but they constitute exceptions which may be said to prove

To speak generally, it is a bad sign when a ewe drinks frequently, and indicates unsoundness in some form. The truth seems to be that as long as herbage is succulent, or is moistened with dew, or from rain from time to time, sheep do not require water.

When ewes are fed on hay they should have water; and when they receive cake and hay together, and are not allowed roots, it is evident that the moisture of the body must be kept on. On the other hand, if they have access to roots they do not require water, and this is one of the best reasons for growing roots on high and dry situations.

Again, the need of ewes which have to support lambs at foot are different to either dry sheep or pregnant ewes. They are called upon to supply a larger quantity of water in their milk, and they must be supplied either directly or through succulent food in or-

PROPER FEEDS AND FOR WINTER PIGS

To Raise Two Litters Annually Young Animal Must Have Exer-One Must Not Allow Overstocking.

(By G. W. BROWN.) There is a decided difference in carsibly talking to the woman two doors and those of the spring litters. On the osition, but I have had very good an was a doctor and gathered her own considered more or less a party to the in previous to the advent of the spring then it is given whole milk for three stir the vitals of a brass monkey or grasses, and have a more generous weeks; then it is gradually changed a cast iron dog. TRADE MORAL—The quality of what you have to sell is known

to some people all of the time and all of the people some of the time, but advertise regularly with us and you'll reach all of the people all of the time.

Speaking of the Divorce Evil

Trying to succeed in business without advertising is like the case of the man who, trying to cut expenses, divorced his wife and alone attempted to keep house and raise his children. It cost him more money for doctor bills and funeral expenses in a year than he gave his wife in a lifetime.

When advertising is disorced, business success becomes failure.

This paper is building your neighbor's business. He has reasons. He tried advertising and it helped him. It is not an experiment - this paper brings results. Good, hard, convincing results - dollars.
